

## PRINT FULFILLMENT WITH ECONOMICAL DELIVERY QUANTITIES

## ABSTRACT OF THE DISCLOSURE

- 5           Various systems, methods, and programs embodied in computer readable mediums are provided for print fulfillment. In one embodiment, a method is provided that comprises the step of maintaining a print quantity in a server. The print quantity maintained is associated with a recipient of printed images. The method also includes the step of accumulating a collection of
- 10 images received from an originator in the server, where the collection of images is associated with the recipient. Also, the method further comprises the step of implementing a printing of the images included in the collection of images when a total number of the images included in the collection of images breaches the print quantity.
